ABOUT

Building scalable software solutions with data-driven intelligence.

Software Developer and Full-Stack Engineer with a strong foundation in modern web technologies, data analytics, and intelligent systems. Passionate about clean code, efficient architectures, and meaningful problem solving.

FOCUS AREAS

- Software development
- Full-stack web development
- Data analytics and AI/ML
- Data structures & algorithms
- Database systems
- Web architectures
- Object-oriented design

ACADEMIC PROGRESSION

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

Java
Python

C++
C
JavaScript

WEB & BACKEND

HTML
CSS
JavaScript
React
Node.js
Spring Boot
Flask
JDBC
REST/JSON

DATA & AI

Python
Pandas
Matplotlib
Scikit-learn
NLTK
R
R Shiny

DATABASE & TOOLS

MySQL
Git
GitHub
Postman
MySQL Workbench
VS Code
IntelliJ IDEA
Canva

EXPERIENCE & LEARNING

Exam Proctor Intern — EnFuse Solutions, Mumbai Sept–Oct 2025

Online exam monitoring, identity verification, malpractice prevention, issue reporting, candidate support

IIT Bombay Techfest, Dec 2025

Ethical Hacking workshop
Machine Learning workshop

Achievements

First Prize Chemistry Competition Class 12
Academic Merit Certificate Second Position Class 11
Member of winning inter-school cricket team
Participation in aptitude tests, technical quizzes,
coding challenges

Projects

A selection of full-stack and data-driven solutions built with modern technologies.

```
function =clientdata /  
const result = []  
for (let i = 0, & data length: 1+=)  
if (data[i] value )  
  
result.push(process[ data[i]]:  
  
return result)
```

01

Digital Consent & Permission Management System

Java, JDBC, MySQL

Role-based consent workflows, organisation approval, user management, audit logs

02

Ultimate Pro Scientific Calculator

HTML/CSS/JavaScript, ES6+, Regex

Memory functions, shift states, and a professional calculator interface

03

AI-Based Fraud App Detection Using Sentiment Analysis and Fraud Risk Scoring

HTML/CSS/JS, Spring Boot, Flask, Python, Scikit-learn, SQL, MySQL

Sentiment analysis, fraud indicators, and risk scoring

04

Customer Complaint Analysis Dashboard

R Shiny, Plotly, Tidyverse

Complaint analysis and interactive dashboard

05

Cricket Performance Analytics

Python, Pandas, Matplotlib

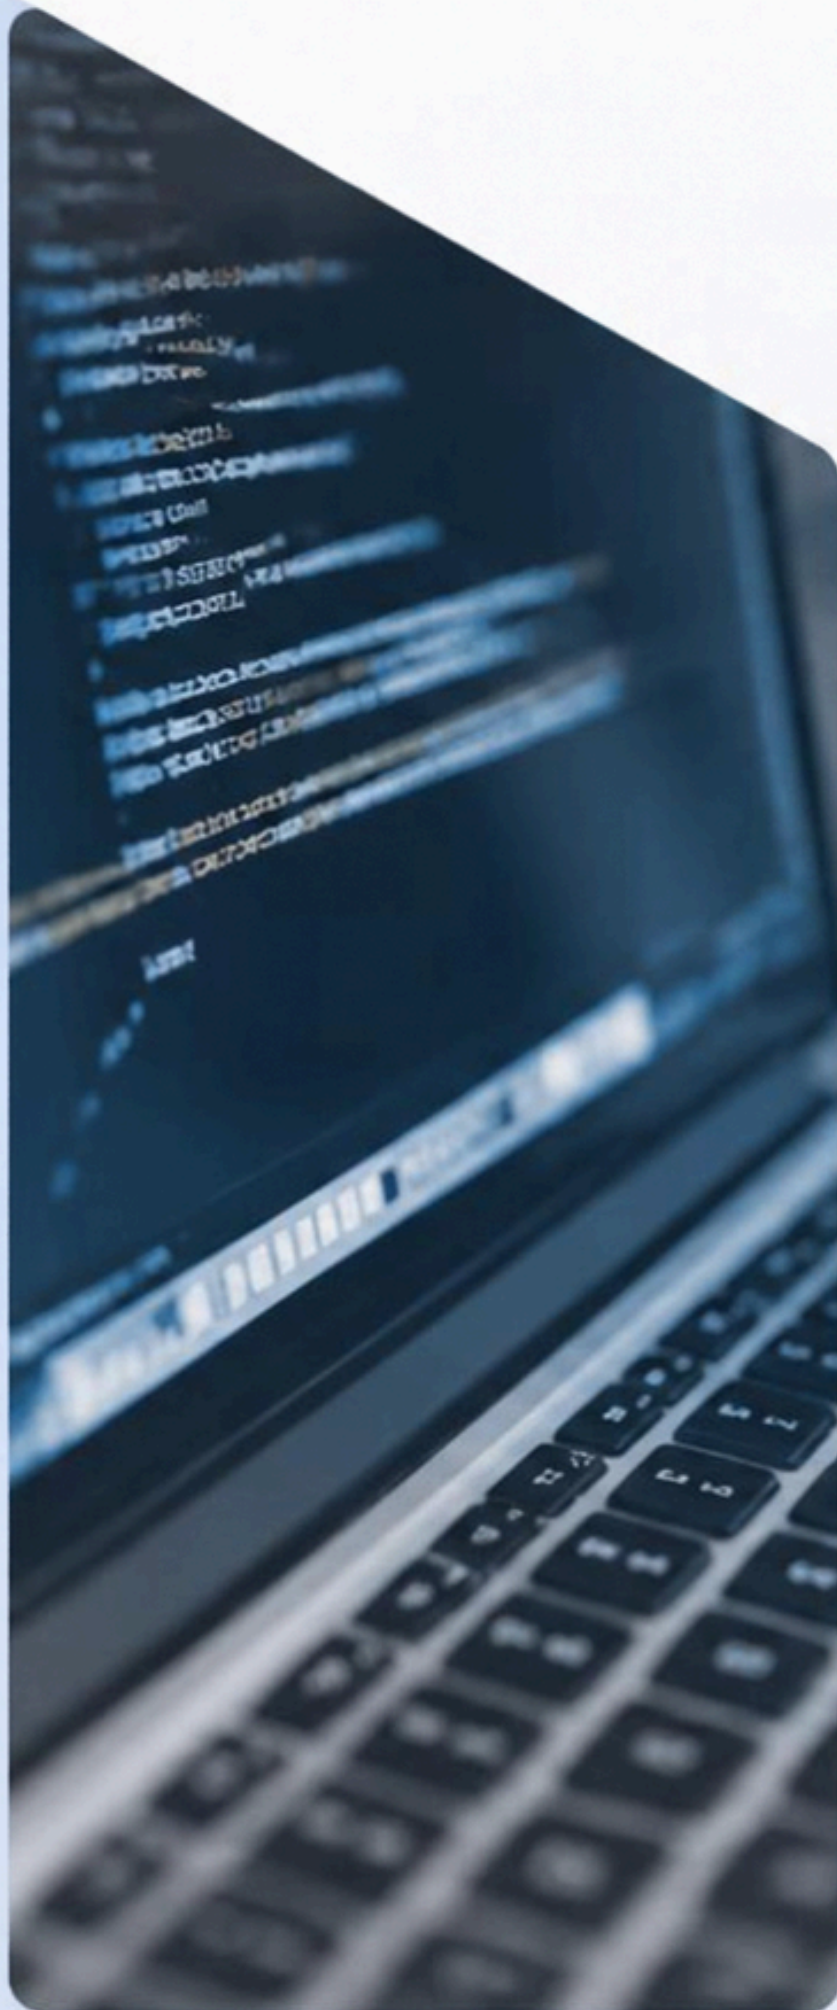

Performance analytics and visualization

06

Amazon Clone Website

HTML, CSS, JavaScript, MySQL

E-commerce interface and database-backed features

07

DepositShield

Web-based rental security-deposit evidence/dispute solution; timestamps property-condition evidence.

ACADEMIC / PERSONAL

08

CivicPulse

Civic problem-solving platform.

ACADEMIC / PERSONAL

09

SmartBook Campus MVP

Campus resource/space booking and management platform.

ACADEMIC / PERSONAL

10

Raspberry Pi Smart Parking System

Raspberry Pi + ultrasonic sensor; parking-slot occupancy detection.

ACADEMIC / PERSONAL

11

Aura Fitness ASP.NET Mini-Project

ASP.NET Web Forms.NET Framework; fitness center management and exercise tracking features.

ACADEMIC / PERSONAL

12

Other Academic Software Projects

Course-based development work including Java/DBC/MySQL, web development and database projects.

ACADEMIC

DEVELOPER PROFILE

A developer who builds scalable web solutions, leverages AI and data to solve real problems, and thrives on continuous learning and innovation.
